

Questions to ask at the sight test

- Are there any significant eye conditions or eye health issues?
- How can I help him/her to best use their vision?
- If he/she is doing any table top activities, what is their best working distance?
- Are there any lighting conditions that may help?
- Is there a need to be referred to the hospital?
- Is he or she eligible to be registered blind/severely sight impaired or partially sighted/sight impaired?
- Will you send a reminder when the next sight test is due?

Questions about glasses

- What are the glasses for and when should they be worn?
- Will the glasses fully correct vision?
- If they won't wear the glasses, how well will they see?
- What do I do if the glasses get broken?
- Can the persons name and if to be worn for near or distance work be inscribed on the glasses?
